VESPRECISION

VES Precision offers a complete machining and engineering service for clients all over the world with capabilities including **5-Axis machining, CNC milling, CNC turning, EDM Wire Erosion, grinding, lapping and surface blasting** as well as a dedicated in-house inspection facility.

For over **25 years** we have been producing precision high-tolerance components for all manner of industries from a broad range of materials including **plastics, stainless and high-speed steel, brass, copper, bronze, tungsten, aluminium** and exotic materials such as **Nimonic 90, Inconel, Stellite and MAR-M-247**.

Examples of work include components for **aero engines, aero life-support systems, oil rings, moulds for healthcare prosthetics, motorsport and the energy sector**. We are also a key producer of strip-cut assemblies aimed at the pharmaceutical and food packaging industries. These solutions are entirely designed and manufactured at our facility in the heart of the West Country.

- **AS9100 approval**
- **ISO9001 approval**
- **NADCAP approval**
- **Approved suppliers to Honeywell, Rolls-Royce, Leonardo Helicopters**
- **Large capacity EDM specialist**
- **Specialist in machining hard materials**
- **In-house design (ISO9001)**
- **Large machine shop facility in premises of over 15,000 square feet**
- **5-Axis CNC capability with pallet loading system**
- **CNC Turn-Milling**
- **CNC Milling**
- **CNC Turning**
- **CNC CMM Inspection**
- **Surface and Cylindrical Grinding**
- **Option to manufacture and supply from stock**
